

Racing technic asbl was created to provide help and support to people who want to practice motor sport racing.

Our goal isn't to provide any sponsorship to any pilot, but more to produce projects involving them. We provide them our team, our material or our know how.

In some specific cases, we take the full project in our charge. We talk then about events !

Our events are organised in the highest level of respect of our partners needs. It's for us an honour to each time provide a perfect service and the best quality of organisation. Sport staying in the domain of competition, we don't give any warranties on the sports results.

The objectives of our projects are first to provide dream, entertainment, but by reducing our effect on environment. Due to that, we ask our providers only products from biologic agriculture and from fare trade. We work as much as possible with local products and local provider strictly selected in order to reduce useless travels.

Because we're a not for profit organisation, made by Motorsport passionate, profit doesn't interests us. We prefer a relation based on quality & confidence with our clients, providers and so on. We refuse any kind of project that don't stick to our values.
